*"To Protect and to Serve"*

# Memorandum

**To:** PSC

**From:** Chief K. Glass

**CC:** Mr. M. Chancey

**Date:** 23 Dec 2015

---

I request SPLOST funding not to exceed the FY2016 CIP of \$45000.00 to purchase Globe G-xcel Turn - Out Safety Gear manufactured to NFPA safety standards and MFD specifications from Bennett Fire Products.

We received quotes from Bennett and NAFECO as listed:

- Bennett \$1917.00 per set
- NAFECO \$1940.00 per set
- Price will increase after 15 January 2015 by \$95.00 per set.

*April 9, 2015*

*To: City of Monroe Fire Department*

*Fr: Danny Bennett, President, Bennett Fire Products Company*

*Re: Summary of Services*

*Representing Globe Firefighter's Suits, America's oldest and largest manufacturer of firefighter's protective clothing, we take great pride in the services we offer. When you purchase a Globe garment, you are buying gear made by the industry leader and the company, since 1887, has set the standard that other manufacturers follow.*

*Providing the Best Fit – Globe patterns are designed to provide the best fit for all shapes and sizes. With different jacket lengths, male and female patterns, along with custom alterations at no extra charge, everyone receives the best fit for their body style. Bennett Fire Products Representatives commit to doing the actual measuring with a minimum of three visits to the Department to give each shift the opportunity to be measured. Sizing Samples are used along with a measuring tape to make certain the fit is as near perfect as possible.*

*Delivery – Measuring will be scheduled within two weeks of notification by the Department, and delivery will be no later than 45-60 days after measurements are taken. Globe's Quick Ship Program is also available for 17-21 day deliveries for a 10% premium. Occasionally, emergency orders are rushed through production for a three week delivery at no additional charge.*

*Main and Emergency Contacts– Ryan Bennett, 678-447-8834, [rbennettbfp@gmail.com](mailto:rbennettbfp@gmail.com)*

*Danny Bennett, Cell 770-402-9910, Office – 800-991-0520, [bennettfire@att.net](mailto:bennettfire@att.net);*

*Gary Rhodes, Globe's Regional Manager, Cell – 828-217-2898, [grhodes@globefiresuits.com](mailto:grhodes@globefiresuits.com)*

*Repairs – Gloves, Inc. is a GA ISP company that Globe recognizes to repair their gear. Bennett Fire Products Company nor Globe is affiliated with Gloves, Inc., but they all do good work. Globe also has a CARES Division at the Factory in New Hampshire. The CARES Division will be responsible for all warranty issues that may arise, and now will cover Velcro under warranty. A new method of cutting Velcro and sealing the edges has corrected the problems the industry had with Velcro during the past decade. All other repairs can be made at Globe and the Department can also set up an account directly with Globe's CARES Division.*

*Care and Maintenance Classes – Globe along with Bennett Fire Products insist Departments participate in these classes. As part of our mission to provide the best clothing for firefighters, we also feel it is extremely important for firefighter safety to teach a PPE care and maintenance class. In addition to firefighter safety, the protective clothing is a very expensive asset owned by the City and it needs to be properly maintained and its life*

*maximized. If we can get this message across to the firefighters during these classes, the Departments save money and their firefighters are healthier. We will commit to holding a class for the City of Monroe FD.*

*Customer Service – Outstanding Customer Service is nothing we really talk about, we just do it. Your Department expects the best, and that is what we have tried to offer since we opened the doors in 1994. Our promise to you starts in the beginning with assisting your Department in developing specifications that best meets your needs, adequately measuring firefighters for proper fit, then delivering gear that meets those specifications and fits the way it should.*

*With Globe, the Industry leader in Firefighter's Protective Clothing, you can count on getting the materials you ordered, constructed to the exact specifications you have developed, delivered in a timely manner, and always at a fair price. Our company specializes and only offers firefighter's protective clothing, and can stay focused on the PPE needs of your Department. References are always a good source of information to check for any vendor's level of customer service.*

*PPE Tracking Program – Globe's tracking program is free to use and is located at [www.ppetracker.com](http://www.ppetracker.com). This site allows your Department to track inventory management for helmets, gloves, hoods, boots, jackets, trousers and masks for each firefighter. Sections include inventory tracking, inspections, repairs, etc. Globe can also import each new order in your database after the order ships.*

*Globe's Quality of Construction - Globe's quality of construction is second to none in the industry with 8-10 stitches per inch, two needle stitched construction seams along with Kevlar reflective trim abrasion cording. These are just two of the construction features that set Globe apart from the others. Other garments may perform well during the short term and feel comfortable because of their loose construction methods and lack of reinforcements, but a Globe garment will outperform others in the long run.*

*Warranty - Globe offers a lifetime warranty against defects in workmanship and material. Velcro is also included in the new Globe 5 Year Support Warranty for Velcro.*

*Prices – Our prices are fair and consistent from year to year.*

*Thank you for your interest in Globe and Bennett Fire Products. We look forward to serving you!*

## Training Specialist

Robert Bennett

[robertj.bennett@fema.dhs.gov](mailto:robertj.bennett@fema.dhs.gov)

301-447-1483

## Upcoming offerings

January 17 - 22, 2016 | January 24 - 29, 2016 | January 31, 2016 - February 5, 2016 | February 7 - 12, 2016 | [View more](#)

## Course description

In this 6-day course, fire officers are introduced to ICS, and they study proper fire command techniques for control and extinguishment of fires ranging from small, residential structures to multioccupancy, commercial complexes.

Topics covered include problem-solving and fire command, interagency and mutual aid, the ICS, incident management, sizeup and strategy, tactics and action plans, truck company operations, engine company operations, building construction and fire behavior, preincident preparation, incident organization, and strategic command. Special emphasis is placed on firefighter safety.

## Selection criteria

Individuals who have responsibility to command incidents within their jurisdiction, company officers, and/or newly appointed officers, including those in an acting position of company officer and/or newly appointed officers from small paid or combination fire departments. Additionally, individuals who are upwardly mobile in their organizations may be considered.

## Prerequisites

ICS 100 level and ICS 200 level training. Preferred courses are Q462 and Q463 available through NFA Online at [www.usfa.fema.gov/training/nfa/courses/online.html](http://www.usfa.fema.gov/training/nfa/courses/online.html). Chief's signature attests that the applicant has completed this required training. Note: A precourse assignment, which will be graded, will be emailed to students 6-8 weeks prior to class start date.
