

Planning and Code Committee Meeting

AGENDA

Monday, September 24, 2018

5:30 PM

City Hall, 215 North Broad Street, Monroe, GA

I. **CALL TO ORDER**

II. **MATTERS BEFORE COMMITTEE**

- [1.](#) R1A Zoning Revision.....Page 2
- [2.](#) City Marshal's Report.....Page 7
3. Other Business

III. **ADJOURN**

ARTICLE VII: DIMENSIONAL REQUIREMENTS AND EXCEPTIONS

Section 700 Charts of Dimensional Requirements.

This Article is established to show the lot, yard, and building dimensional requirements for land uses within each district. For dimensional requirements and exceptions for Planned Development Districts, see Sections 650 – 655.

700.1 R1, R1A, R2, MH Dimensional Requirements: The following chart delineates dimensional requirements for the specified residential zoning districts. For the chart of use provisions by district, see Article VI. For supplementary standards for specific uses, see Article X.

**Section 700.1: Table 11-Residential Zoning District Dimensional
Requirements**

	R1	R1A	R2	MH
LOT				See Note(2)
Lot area, min (1)	14,000 sf	7,500 sf	5 acres	10 acres
Lot density, maximum	3.0 upa	5.0 upa	6.0 upa See note (6)	4.0 upa
Lot coverage, max	40%	40%	40%	40%
Lot width, min at building line	100 ft.	50 ft.	150 ft.	200 ft.
Lot frontage, min	75 ft.	50 ft.	150 ft.	200 ft.
Lot depth, min.	XXXXX	80 ft.	XXXXX	XXXXX
		Refer to Note 7 for subdivi- sions of 2 acres or more and/or 5 lots or more.		
YARD				
Setback, front yard(min) highways and arterials	40 ft. min See note(3)	40 ft. min See note(3)	40 ft. min See note(3)	50 ft. min See note(3)
Setback, front yard (min) collectors and other streets	30 ft. min See note (3)	15 ft. min See note (3)	30 ft.	50 ft.
Setback, side yard (min)	10 ft. min	6 ft.	25 ft. See note (4)	50 ft. See note (4)
Setback, rear yard (min)	25 ft	20 ft.	50 ft.	50 ft.
BUILDING				
Building height, max (5)	35 ft.	35 ft.	35 ft.	35 ft.

Building ground floor area, min square footage	1,600 sf	1,300 sf	800 sf-1-bedroom 1000 sf-2 bedroom 1,200 sf-3 bedroom	1,300 sf
Building width, min	24ft.	24ft.	16ft.	16ft.

Notes for Table 11, Section 700.1

- (1) Encompasses area for accessory buildings and uses, including parking, loading and unloading space, storage and parking, screening, lighting, and stormwater management measures. The minimum lot area cited in this Article shall be increased in all situations where public sanitary sewer service is not utilized and the Walton County Health Department requires a larger lot for proper septic tank operation.
- (2) Area requirements for manufactured home parks and individual manufactured home spaces within parks are set forth in Section 1045.
- (3) Front building line shall conform to the mean building line established by existing buildings along a developed block. For properties located with overlay districts (HPO and CDO), the frontage setbacks are established by the designated design review board to maintain the most compatible building line along a historic block or design corridor.
- (4) Attached dwelling unit buildings must also have a twenty (20) foot setback between buildings on the property; for townhouses the twenty (20) foot setback is applied between buildings and not between individual dwelling units.
- (5) Church spires, belfries, cupolas, monuments, water towers, chimneys, flues, flagpoles, television antennae, and radio aerials are exempt.
- (6) The maximum lot density may be increased to 10 upa for multi-family dwelling developments at the discretion of and after submission of site review and approval by the Planning Commission. In addition, the maximum number of dwelling units per building may be increased from 8 to 24 units per building. In order for a multi-family dwelling development to be granted said increase in maximum lot density and per building capacity, the development should contain a minimum of five of the following site and use features:
 - (a) Approved comprehensive landscape plan including the use of significant ornamental landscaping materials.
 - (b) Increased side and rear landscaped buffers to minimize impact of the development on any single family residential uses adjacent to the development.
 - (c) Onsite Property Management providing a minimum of 20 hours per week of onsite management
 - (d) Use of the services of a POST certified law enforcement officer to serve as a "Courtesy Officer" for the development.
 - (e) Controlled access gates at all entrances to the development.
 - (f) Common trash refuse compactor for resident use only properly blinded from view.
 - (g) Common central mail receptacle for the development approved by the Postmaster.

Further, the development should provide for the installation and continued maintenance and upkeep of six of the following amenities for use by residents of the development:

- (a) Swimming Pool
- (b) Children's Playground
- (c) Pavilion at least 100 sq ft in size and a grassed picnic area at least 1,000 sq ft in size
- (d) Tennis Court(s)
- (e) Onsite Laundry Facility
- (f) Onsite Indoor Fitness Center
- (g) Indoor Community Center/Clubhouse
- (h) Indoor Theater Room
- (i) Business Center

Further, the development should incorporate at least four of the following architectural design standards and guidelines:

- (a) Brick, wood or masonry siding on all sides of all building. Vinyl and/or metal siding shall not be permitted.
- (b) Varied shading of brick and siding colors to provide pleasing aesthetics.
- (c) Varied fenestration and elevations and roof pitches.
- (d) Three Dimensional Architectural Asphalt Roof Shingles.
- (e) Wood and No Rot Composite trim boards only for corner boards, frieze boards and soffet trim (No vinyl siding components on exterior)
- (f) Implementation of Energy Efficient Construction Methods, then existing, as recommended and approved by the Code Enforcement Officer that exceed all then existing building code standards and requirements.

(7) The following limits and standards apply to subdivision of 2 acres or more and five lots or more in lieu of minimum lot size requirements:

a) Dead ends and cul-de-sacs

Dead end streets and/or cul-de-sacs may not serve more than 19 units. No dead-end street shall exceed 500 feet in length, not including the turnaround. [Note: Length conflicts with Section 8.10.1 of Developments Regs.] Dead end roads must terminate in an improved turnaround as defined in the Development Regulations. Streets that are temporary dead ends are exempt from these requirements, but must provide a temporary turnaround when determined necessary by the planning director.

b) Future extension of streets. Where necessary to give access to or permit the subdivision of adjoining land, streets shall be extended to the boundary of the subdivision and the resulting dead-end streets may be approved without a turnaround at the discretion of the planning director. Reserve strips and/or street plugs may be required to preserve the objectives of street extensions.

c) Existing streets. Whenever possible, existing streets terminating at the boundary of the parcel to be developed shall extended into the parcel in order to promote a continuous street grid and network.

d) Alleys shall be required in developments that have lots of 6,000 square feet or less, or lot frontages of 50 feet or less. No unpaved alleys shall be allowed. Alleys shall be paved to a minimum width of 16 feet or 12 feet with a minimum two-foot all-weather shoulder on each side. The minimum easement of an alley shall be no less than 24 feet in width. [Note: alley width conflicts with Section 9.5 of Developments Regs.]

e) Blocks. Each block shall have a maximum area of four acres and a maximum length of 600 feet unless the planning director determines topographical conditions or manmade barriers justify an exception. [Note: Block length conflicts with Section 8.9.2 of Developments Regs.] The block dimensions shall be measured between minimum 50-foot-wide street rights-of-way. Minimum 50-foot-wide open space areas can also be used for block separations when approved by the planning director. Blocks shall have sufficient width to provide for two tiers of lots. Single-tier lots and through lots shall be avoided except where essential to provide separation of residential development from major traffic arteries or adjacent nonresidential activities. Where located adjacent to the external boundary of the development, or where the planning director determines such lots to be necessary to overcome specific disadvantages of topography and orientation, a planting screen of at least 15 feet wide shall be required. The planting screen shall be developed to the standards contained in Section 550 "Screening, Buffering, and Landscaping", shall be required along the line of lots abutting such a traffic artery or nonresidential use. Lots with required planting screens shall meet the minimum lot depth, excluding the planting screen area. No vehicular access shall be allowed to cross planting screen.,

f) **Open Space Required.** All developments with a base density of ten units or greater shall be required to provide a minimum of five percent of the adjusted development acreage in open space that is not subject to bonus point calculations. Common open space set aside within the adjusted development acreage area shall count towards base density. A density bonus shall be awarded only to that open space area within the adjusted development acreage area in excess of five percent required for developments of ten units or greater. Open space shall be optional for all developments less than ten units.

Common open spaces shall be provided in the form of natural areas, playgrounds, active or passive recreational areas, and similar areas such as pocket parks where mail kiosks are located. Open spaces shall be designated as "outlots" and will not be bound by dimensional requirements per Table 11. Required open spaces shall be owned and maintained by the Homeowner's Association and shall be accessible to the residences of the development.

g) **Density.** For subdivisions of more than two acres, density shall be calculated by multiplying the number of lots allowed by the adjusted development acreage. For subdivisions of two acres or less, the general regulations regarding lot dimensions set forth in Table 11 shall apply. For the purposes of this chapter, the following areas shall not be included in the adjusted development acreage.

1. Land within the 100-year floodplain.
2. Bodies of open water.
3. Jurisdictional wetlands that meet the definition of the Army Corps of Engineers pursuant to the Clean Water Act.
4. Land lying within the Stream Buffer and Setback requirements per Section 42-274 of the City of Monroe Code of Ordinances, and land lying within the state-mandated 25-foot riparian buffer.
5. Areas with slopes equal to or greater than 25 percent which are at least 5,000 square feet contiguous area. These areas must remain undisturbed with the exception of easements for drainage access and underground utilities.

Density bonus. The permitted base density may be increased by the percentage gained through bonus points.

1. The maximum bonus permitted shall be 25 percent.
2. Provision of common open space. For developments of ten units or greater which provide greater than five percent open space, a one-percent bonus shall be awarded for each one percent of the total adjusted development acreage in common open space over the required five percent. The purpose of the density bonus for common open space is to permit areas that could otherwise be developed, or sold as individual lots, to be retained in their natural state or to be developed as a recreational amenity. It is not the purpose of this provision to permit density bonuses for incidental open spaces which have no realistic use by project residents on a day to day basis. No bonus points shall be awarded for the minimum five percent required open space of the adjusted development acreage, as specified in 7g of this Section.

h) **Street Trees Required**

1. One street tree shall be planted for each 40 feet of frontage for that portion of a lot fronting the street.
2. Where feasible, existing healthy trees on the site or lot of greater than two inches dbh shall be incorporated into the required streetscape.
3. Trees may be spaced at variable distances to conform to unique site conditions, however, they must be more or less evenly distributed across the front lot line.
4. Trees shall be planted within 5 feet of the front lot line in order to be considered as meeting this requirement.
5. Only large canopy trees shall be used as street trees. In areas where trees may conflict with overhead utility lines, small canopy trees may be substitute. Tree species, canopy size and location is subject to approval by the planning director.

i) **Sidewalks Required.** Sidewalks shall be 4 feet in width, constructed and located in conformance

with Section 9.17 of the Development Regulations for the City of Monroe.

- j) **Building Materials.** Brick and wood siding are the most common traditional building materials in the City of Monroe. Brick is the preferred exterior material. Materials having a wood siding appearance, such as cementitious products are compatible substitutions provided that the proposed reveal is similar to that of existing historic examples. Aluminum and vinyl siding are not permitted.
- k) **Building Design Standards.** Subdivisions platted with an overall density exceeding 2.5 dwelling units per acre or for any residential lot of less than 8,000 square feet, the following restrictions apply:
1. Buildings shall utilize at least two of the following design features to provide visual relief along the front of the residence:
 - a. Dormers.
 - b. Gables.
 - c. Recessed entries.
 - d. Covered front porches.
 - e. Cupolas.
 - f. Pillars or posts.
 - g. Bay window (min. 24-inch projection)
 2. The front facade area of the garage shall not occupy more than 40 percent of the total front facade area for the building. The front facade area of the garage shall mean the total external surface area of the facade containing the primary garage bay opening that faces a public right-of-way. The front facade area of the garage square footage shall be defined by the internal width and height of the space used for the garage. The total front facade area for the building shall be exclusive of roofing. This measurement does not apply to garages facing an alley.
 3. No adjacent home may be of the same design and floor plan.
 4. Walls which face a street other than an alley must contain at least 20 percent of the wall space in windows or doors (not including garage doors).
 5. Primary entries shall be accessed directly from the public street and sidewalk.
 6. Windows shall be provided with trim. Windows shall not be flush with exterior wall treatment. Windows shall be provided with an architectural surround at the jamb.
 7. The primary structure shall have a minimum roof slope of 6:12. Ancillary roof slopes (such as shed dormer roofs and porch roofs) shall have a minimum slope of 4:12.
 8. Exterior finishes shall be primarily wood or cementitious siding products, brick, stucco (excluding EIFS-type products) or other decorative masonry.
- l) **Homeowner's Association Required.** A homeowner's association shall be established. Membership shall be automatic and mandatory for all lot owners in the subdivision and their successors. The homeowner's association shall have the power to file liens to collect dues and assessments. The homeowner's association shall be formed under the provisions of O.C.G.A. § 44-3-220 et seq. (the "Georgia Property Owners' Association Act"). Documentation organizing the homeowner's association shall be provided to the City's Attorney's Office for review in conjunction with the submittal of the draft open space management plan. Approval of the organizing documentation must be received prior to final plat approval.
